Writing

Actually, I don't like playing any computer games. I think they take a lot of people's time, so they become lazy and they don't want to do anything else, ^{except} ~~expect~~ this games. But when I was about twelve years old I used to like to play the Minecraft. I was one funny thing. I was playing this game just on my phone. I used to like this game because ~~he~~ ^{it} has cool and unusual graphic. In Minecraft you can explore the world including different places and climate conditions. You can also find a village and get some useful things or build your own house. For this you should at first find any resources, like ~~strong~~ parts of trees, water maybe and else. But the main goal of Minecraft ~~it~~ is get to the another world, win some monsters and, finally, win the final boss. But it's really difficult, I think, by the way, I had never completed the game so I just used to love playing them without monsters, dangerous events and other. Unfortunately, now I don't play Minecraft, but I can give you a valuable advice – you should try a lot of games if you like it. Because some games are really good and they can give you important lessons and improve your qualities. And I think it is great.
