Writing

"Procrastination is the thief of time, collar him" - I absolutely agree with this statement. When you postpone some things that you can make today, you do totally wrong decision. If person hesitate all the time he wastes his time. There are so many interesting things you can do during the each day, but procrastination makes you lazy. People must be really hard-working if they want to achieve their goals and dreams. For example there are some special days when you do not want to do anything, ~~but~~ you just lying on the sofa and watching TV. Imagine how many things you could do by that time. In this case you should be very disciplined person. Discipline is very important for people. Sometimes you have no wishes to do your work, but you have the main thing - discipline. It will help you during the whole life. I'm sure that discipline is the great ~~superpower~~ ability to face with procrastination. You don't have to ~~life~~ ^{avoidance} from work, from house routine, from sitting on from doing your homework! Remember, everytime you ~~doing~~ nothing you waste your time!

In Conclusion, I'd like to say with Charles Dickens's statement, he is totally write with it and my advice to you: don't hesitate, do not postpone your things for another day! Remember that you live only once, and if you want to achieve your goals forget about laziness and such word as "procrastination" forever!
